Filing Date: May 23, 2001
Docket No.: OG-003

Listing of Claims

1. (Previously presented) A method, comprising:

(a) using conference software executing on an organizer computer system to define a conference and to store conference information associated with the conference, the conference information including a list of attendees, the conference information being stored on the organizer computer system;

(b) at the conference a wireless device of a first attendee establishes wireless communication with the organizer computer system;

(c) if the first attendee is on the list of attendees then the first attendee is registered with the conference software, each attendee registered has a personal proxy and a real identity;

(d) upon registration the first attendee receives access to updated conference information via the first attendee's wireless device, the updated conference information including the list of attendees, at least a part of the updated conference information being moved into the personal proxy of the first attendee;

(e) the first attendee during the conference updates the conference information by modifying first attendee sharing information within the conference information, the first attendee sharing information being information provided by the first attendee that is shared with other attendees, the first attendee sharing information being stored on the organizer computer system;

(f) a second attendee having a registered wireless device accesses the conference information as updated in (e) and moves at least part of the first attendee sharing information into the personal proxy of the second attendee;

(g) the second attendee looks through conference information stored in the second attendee's personal proxy and moves a selected part of that information to the second attendee's real identity; and

Filing Date: May 23, 2001
Docket No.: OG-003

(h) the first attendee looks through conference information stored in the first attendee's personal proxy and moves a selected part of that information to the first attendee's real identity.

2. (Previously presented) The method of Claim 1, wherein the first attendee uses the first attendee's wireless device to update the conference information in (e).

3. (Previously presented) The method of Claim 1, wherein the first attendee uses a personal computer to update the conference information in (e), the personal computer being coupled to the organizer computer system via the internet.

4. (Previously presented) The method of Claim 1, wherein the wireless device of the first attendee is taken from the group consisting of a WAP phone or a PDA, and wherein the wireless device of the second attendee is taken from the group consisting of a WAP phone or a PDA.

5. (Previously presented) The method of Claim 1, wherein a conference organizer defines the conference in step (a), the conference organizer also being an attendee on the list of attendees, the conference organizer attending the conference and having a registered wireless device.

6. (Previously presented) The method of Claim 1, wherein a conference organizer defines the conference in step (a) by entering the list of attendees using the conference software and by entering a conference time using the conference software.

7. (Previously presented) The method of Claim 1, wherein the personal proxy of an attendee includes storage space disposed on the organizer computer system where the attendee can store conference information, and wherein the real identity of an attendee includes a second storage space identified by an email

Applicants: Jens Horstmann et al
Serial No.: 09/864,479
Filing Date: May 23, 2001
Docket No.: OG-003

address, the attendee using the second storage space to store more than information associated with the conference.

8. (Previously presented) The method of Claim 1, wherein the personal proxy of an attendee includes a first mailbox, and wherein the real identity of the attendee is a second mailbox.

9. (Previously presented) The method of Claim 1, wherein the first attendee updates the conference information in (e) by providing links to selected information stored on a computer other than the organizer computer system.

10. (Previously presented) The method of Claim 1, wherein the first attendee updates the conference information in (e) by moving the first attendee sharing information from the first attendee's real identity to the organizer computer system, the first attendee using the first attendee's wireless device to initiate the move.

11. (Previously presented) The method of Claim 1, wherein the part of the updated conference information moved into the personal proxy of the first attendee in (d) is an agenda of the conference.

12. (Previously presented) The method of Claim 1, wherein the part of the updated conference information moved into the personal proxy of the first attendee in (d) is an electronic business card of an attendee.

13. (Previously presented) The method of Claim 1, wherein the conference information stored on the organizer computer system includes a message board, the message board being accessible by the first attendee using the first attendee's wireless device, the message board being accessible by the second

Filing Date: May 23, 2001
Docket No.: OG-003

attendee using the second attendee's wireless device, the message board containing messages for multiple attendees.

14. (Previously presented) A system comprising:

a computer system comprising a wireless communication station, the wireless communication station being disposed at a conference location, the computer system storing a list of conference attendees, the computer system maintaining a personal proxy mailbox for an attendee on the list of conference attendees, the attendee having another mailbox that is not maintained by the computer system; and

a wireless device that communicates at the conference location with the wireless communication station, the wireless device being usable: 1) to retrieve an indication of the personal proxy mailbox from the computer system, and 2) to send a message to the personal proxy mailbox of the attendee using the indication of the personal proxy mailbox retrieved from the computer system.

15. (Previously presented) The system of Claim 14, wherein the indication of the personal proxy mailbox is the name of the personal proxy mailbox maintained on the computer system, the indication of the personal proxy mailbox being retrieved by the wireless device as part of the list of conference attendees, wherein the other mailbox is the primary business email address of the attendee.

16. (Previously presented) The system of Claim 14, wherein the computer system stores a conference agenda, the wireless device being usable to retrieve and display the conference agenda.

17. (Previously presented) The system of Claim 14, wherein the computer system stores information about an exhibit of a first conference exhibitor and stores information about an exhibit of a second conference exhibitor, the computer system having an interface that allows the first conference exhibitor to

Serial No.: 09/864,479
Filing Date: May 23, 2001
Docket No.: OG-003

modify the information about the exhibit of the first conference exhibitor but does not allow the first conference exhibitor to modify the information about the exhibit of the second conference exhibitor, and wherein the interface allows the second conference exhibitor to modify the information about the exhibit of the second conference exhibitor but does not allow the second conference exhibitor to modify the information about the exhibit of the first conference exhibitor.

18. (Previously presented) The system of Claim 15, wherein the attendee has a name, and wherein the indication of the personal proxy mailbox has a first part and a second part, the first part being indicative of the name of the attendee, the second part being indicative of a conference name.

19. (Previously presented) The system of Claim 14, wherein the computer system maintains a message board, the wireless device being usable to place a message on the message board, the wireless device being usable to read a message from the message board.

20. (Previously presented) The system of Claim 14, wherein the computer system stores a map of the conference location, the wireless device being usable to retrieve from the computer system and to display the map on the wireless device.

21. (Currently amended) A ~~computer-readable medium having~~ set of computer-executable instructions stored on a computer-readable medium, the set of computer-executable instructions being for performing the steps of:

maintaining a list of conference attendees on a conference organizer's computer system, each of the conference attendees having a corresponding wireless device;

Applicants: Jens Horstmann et al
Serial No.: 09/864,479
Filing Date: May 23, 2001
Docket No.: OG-003

maintaining on the conference organizer's computer system a personal proxy mailbox for each of the conference attendees on the list of conference attendees;

interfacing the conference organizer's computer system with a wireless communication station such that the conference organizer's computer system can communicate in wireless fashion with the wireless devices of the conference attendees when the wireless devices are present at a conference;

registering conference attendees on the list of conference attendees; and

allowing a first wireless device of a first registered conference attendee to select a second registered conference attendee from the list of conference attendees and to send a message to the personal proxy mailbox of the second registered conference attendee, wherein the second registered conference attendee has a primary email address other than the personal proxy mailbox of the second registered conference attendee, the primary email address of the second registered conference attendee not being divulged to the first registered conference attendee.

22. (Currently amended) The set of computer executable instructions ~~computer-readable-medium~~ of Claim 21, wherein the conference has a duration, and wherein the conference organizer's computer system allows a conference attendee to access his/her personal proxy mailbox only for a period of time that roughly corresponds to the duration of the conference.

23. (Currently amended) The set of computer executable instructions ~~computer-readable-medium~~ of Claim 21, wherein the second conference attendee can use his/her wireless device to move selected information from his/her personal proxy mailbox into his/her primary email address.

24. (Previously presented) A method comprising:

Applicants: Jens Horstmann et al
Serial No.: 09/864,479
Filing Date: May 23, 2001
Docket No.: OG-003

maintaining a plurality of personal proxies for a conference, each of the personal proxies having a personal proxy name, each of the personal proxies being maintained on a computer system and being associated with a respective one of a plurality of attendees of the conference, each of the attendees also having an email mailbox that is different than the personal proxy of the attendee and that is not maintained on or by the computer system, each of the attendees having a wireless communication device;

providing a wireless communication link between the wireless communication devices of the attendees and the computer system, each attendee being able to access his/her personal proxy on the computer system using his/her wireless communication device, wherein the conference has a duration, wherein each attendee is allowed to access his/her personal proxy only for a period of time that roughly corresponds to the duration of the conference; and

providing the personal proxy names to the attendees of the conference, each attendee being able to view the personal proxy names using his/her wireless communication device.

25. (Previously presented) The method of Claim 24, wherein the conference has a name, each personal proxy name having a first part and a second part, the first part being indicative of a name of the conference attendee, the second part being indicative of the name of the conference, and wherein the email mailbox of an attendee is the primary business email address of the attendee.

26. (New) The set of computer-executable instructions of Claim 21, wherein each conference attendee is provided a personal proxy by the conference organizer's computer system, each personal proxy including a personal proxy mailbox and also including a storage area.

Applicants: Jens Horstmann et al
Serial No.: 09/864,479
Filing Date: May 23, 2001
Docket No.: OG-003

27. (New) The method of Claim 24, wherein each personal proxy of the plurality of personal proxies includes a mailbox and a storage area.

28. (New) A set of computer-executable instructions stored on a computer-readable medium, the set of computer-executable instructions being for:

- maintaining on a conference organizer's computer system a mailbox for each of a plurality of conference attendees;

- automatically registering a conference attendee when a communication is established between the conference organizer's computer system and the wireless device of the conference attendee;

- providing a list of conference attendees to the conference attendee such that the conference attendee can view the list on his/her wireless device, wherein the list includes addresses of the mailboxes of the conference attendees maintained on the conference organizer's computer system; and

- allowing the conference attendee to use his/her device to move selected information from his/her mailbox on the conference organizer's computer system into his/her wireless device.

29. (New) The set of computer-executable instructions of Claim 28, wherein the set of computer-executable instructions is also for:

- after the conference, the organizer's computer system sending the conference attendee an alert of an upcoming deletion of information in the conference attendee's mailbox.
